**1 Department of Physician Assistant Program, University of North Carolina
School of Medicine**

a. University Mission:

b. Program Mission (if more than one program, list each mission):

MISSION

The mission of the Department of Physician Assistant is to be a learning community dedicated to developing generalist health care professionals by:

- Valuing students
- Integrating teaching, scholarship, practice, and service
- Partnering with the community

DECLARATORY

It is the intent of the department that the education and training received will prepare and encourage students to provide primary care in areas where the need is greatest. Service and clinical education in underserved and rural areas and with minority populations is emphasized.

c. The role of the program (s) and relationship to the University mission: Explain in 1-2 concise paragraphs.

The Department of Physician Assistant Master of Physician Assistant degree supports the University mission by:

- Providing students with a high quality, competency based education which prepares graduates to pass a professional board certification examination and practice medicine with appropriate supervision, helping to meet the health care needs

- developing and implementing a comprehensive patient-centered approach to health care.
- develop a medical knowledge base that provides a foundation for practicing medicine in a variety of settings.
- achieve competency in medical and technical skill that prepares them to provide health care to individuals of all ages.
- develop skill that prepares them to interact as professionals within an interdisciplinary health care environment.
- develop an awareness of the ethical, social, and legal issues related to the practice of medicine.
- develop skills for continuing professional growth and lifelong learning.
- are encouraged to provide health care services to medically underserved populations.

The Program monitors yearly AAPA census data to determine location, setting, and practice data from the WSU PA Program alumni. Results of the most recent national census data (2009) show that the Program continues to fulfill our aim of preparing graduates for primary care practice to rural and underserved areas as demonstrated by higher percentages of WSU graduates practicing in these areas as compared to national averages.

Co p , on o o A n nd N 7 , on o o ce		N 7 , on

* Winning by competitive audition. **Professional attainment (e.g., commercial recording). ***Principal role in a performance. ****Commissioned or included in a collection. KBOR data minima for UG programs: Majors=25; Graduates=10; Faculty=3; KBOR data minima for master programs: Majors=20; Graduates=5; Faculty=3 additional; KBOR data minima for doctoral programs: Majors=5; Graduates=2; Faculty=2 additional.

The caliber of teaching excellence within the Program has also been formally acknowledged. The CHP Annual Award for Teaching Excellence was awarded to Dr. Hale in 2000 and in 2008 and to Ms. Nyberg in 2006. In addition, Dr. Hale's expertise in teaching has been recognized at the university level through receiving the WSU Academy of Effective Teaching and the WSU Leadership in the Advancement of Teaching awards.

Faculty teaching assignments relate to their respective background, experience, and interests. At a minimum, faculty are responsible for teaching; evaluating student performance; academic counseling; providing remediation; developing, implementing, and evaluating curriculum; administering and evaluating the Program; application review, student interviews

and implements comprehensive patient-centered healthcare.		
C p - Apply comprehensive principles from biological, physical, social, and behavioral sciences in the management of patients.	<ul style="list-style-type: none"> • Course grades • Graduate performance on NCCPA Board Certification exam • Preceptor evaluation of students on clinical rotations (formal evaluation mechanism implemented in Jan. 2009) 	Summary of NCCPA Board Certification exam, PACKRAT exam and summary of preceptor evaluations of students are noted below
C p - Apply scientific knowledge, humanistic values, critical analysis, and a systematic approach to solving problems.	<ul style="list-style-type: none"> • Course grades • Graduate performance on NCCPA Board Certification exam • Preceptor evaluation of students on clinical rotations (formal evaluation mechanism implemented in Jan. 2009) 	Summary of NCCPA Board Certification exam, PACKRAT exam and summary of preceptor evaluations of students are noted below

Finally, the Program asks our clinical preceptors to rate each student's performance at the end of each clinical rotation. These questions/areas of competence are taken directly from the PA professional competencies developed by our professional organizations. Overall, preceptors rate students quite high in all areas of evaluated competence.

Preceptor Performance Competency

Report Date 07/31/2010 - Sorted by Mean

Scale - .4 above average, .6 outstanding

Item ID	Item	Mean	Std
1406718	Demonstrate caring and respectful behaviors when interacting with patients and their families	4.6	0.54
1406728	Respect, compassion, and integrity	4.6	0.54
1406712	Work effectively with physicians and other health care professionals as a member of a health care team	4.6	0.62
1406727	Professional relationships with physician supervisors and other health care providers	4.6	0.63

student recruitment and retention). Also indicate whether the program is accredited by a specialty accrediting body including the next review date and concerns from the last review.

Provide assessment here:

As noted above the PA Program continues to meet all educational objectives as evidenced by the data included in this report and our most recent accreditation review of the Program by Accreditation Review Commission on Education for the Physician Assistant (ARC-PA). This review occurred in October 2010 and resulted in reaccreditation through 2018. This was the first time that the Program received the longest period of time allowed for established PA Programs.

- a. Provide a brief assessment of the cost and service the Program provides. Comment on percentage of SCH taken by majors and non-majors, nature of Program in terms of the service it provides to other University programs, faculty service to the institution, and beyond.

Provide assessment here:

Students in the PA Program are enrolled in a high number of credit hours for a graduate student (42 credit hours in their first year, 40 in their second year). The Program is also lock-step in nature with one cohort admitted per year. Salaries of PA Program faculty are higher than university average because of the increasing salaries noted in the clinical job marketplace. Forbes magazine rated the PA graduate degree as its top recommended masters degree because of increased demand and rising salaries. The issue of faculty r

The use of clinically active physicians and physician assistants as instructional faculty in all areas of the didactic and clinical curriculum is felt to be an undisputable strength for role modeling and professional identification. Early introduction to and emphasis on experiential learning is also a distinct asset of the Program. This, along with logical and strategic placement of curriculum units, encourages student understanding and solidifies the connection between the didactic core and the clinical practicum. Student exposure to academic clinical settings, clinical rotations, and preceptorships provide an excellent variety of patients and instructional/practitioner philosophies.

One of the most valued Program assets is our reputation for excellence among our preceptors and alumni. Data from the most recent alumni survey revealed that a significant majority of alumni agree that the Program maintains a reputation of excellence in *academic* (4.40; scale 1 – 5, 5=strongly agree) and *clinical instruction* (4.35; scale 1 – 5, 5=strongly agree) and that we *fulfill our aim* to prepare students to provide primary care in areas of need (4.35; scale 1 – 5, 5=strongly agree). Program faculty and staff are qualified, dedicated, and strive for excellence in all areas of Program operation. The design of the curriculum together with the commitment of the Program faculty to identify and cultivate those qualities and characteristics believed to be important for the physician assistant role result in graduates who exemplify the standards and philosophy of the Program and the profession. The Program remains on a steady course of growth and innovation, surviving times of curriculum reorganization and staffing changes.

In conclusion, the Program, in existence for over 39 years, continues to grow and operate with an increasing measure of excellence each year and with every new class of students. The inherent strengths of the Program contribute to its stability and outweigh its weaknesses. As evidenced by 316(o)9.93324(u)20.8236(r)17.178(e)19.2736()10.4118(s.1784(a)8.38316
